

Mangawhai Shared Path

Phase Three

Project Update #1

Downer, on behalf of Kaipara District Council are constructing Phase 3 of the shared path network. This includes 1.5km section between the village and Mangawhai Central, and a 900m section between ITM and Wood Street.

Works have begun on Molesworth Drive, between Dune View Drive and Old Waipu Road. Construction in this section is expected to take 3 months with crews moving as quickly as possible. Two-way traffic will be maintained, this requires the utilisation of the shoulder and carparks on the Eastern side to maintain a safe thoroughfare area. Pedestrian access has also been temporarily relocated to the Western side.

Traffic Control FAQ's

- **Why is the traffic control area so long?**
Downer plans to move quickly and require the area to be safe and ready for our construction teams.
- **Why are carparks being coned off?**
The shoulder area on the Western side of including the carparks are temporarily required to create a two-way traffic system while we work on the Eastern side of Molesworth Drive.
- **Why can't the traffic control be set up multiple times?**
Installing the traffic control once instead of multiple times results in significant cost savings.

Schedule of Works

We're building the shared path in stages.

PHASE 1 & 2 COMPLETED PHASE 3 PHASE 4 PHASE 5

Please note that the shared path route and design is still to be finalised for Phase 4 and 5. For more information on the Mangawhai Shared Path go to mangawhaicomunityplan.co.nz
